Vishal Singh

CRM Manager | iGaming Lifecycle, Retention and Player Engagement

vs111142@gmail.com | +91 91600 18313 | linkedin.com/in/ig-vishal-singh | aboutvishal.equibytetechnologies.com | Hyderabad, India (Remote)

PROFILE

- CRM Manager with 5+ years in iGaming, owning the full player lifecycle from first deposit to VIP.
- Runs CRM hands-on across Smartico, Solitics and Optimove, on SoftSwiss, Gr8 Tech and Pragmatic Solutions platforms.
- Commercially minded, testing every offer against a holdout and managing it against a reward cost target.
- Strong across crypto and fiat, multi-brand and multi-market operations, with PMP and CSPO delivery discipline.

STRATEGIES IMPLEMENTED

- Player lifecycle and CAC tracking, with onboarding built around the first 5 deposits so each player pays back acquisition cost.
- Retention strategies including weekly cashback, a 5-day cashback ladder, gamification, rewards and a loyalty store.
- Acquisition, VIP and reactivation journeys, automated for each key moment from welcome offer to win-back.
- Reporting, feedback and KPIs, with weekly reviews that feed straight back into offers, triggers and platform rules.

EXPERIENCE

CRM Manager, Retention & Lifecycle

Mar 2024 to Present

Straight-Talk iGaming, Remote | Multi-brand, crypto-friendly casino and sportsbook operator

- Own CRM end to end for a 100K+ player base across DACH, wider Europe, Australia and New Zealand.
- Run segmentation, automated journeys and campaigns on Solitics with SoftSwiss, across email, SMS, push and on-site.
- Designed a 5-day cashback ladder and tested it against a 10% holdout, which lifted NGR per player by 47% vs holdout and 20% vs standard cashback.
- Turned the test into a lasting model, with weekly cashback for 3 weeks and the ladder in week 4 to keep bonus cost under control.
- Manage reward cost per brand against monthly targets of 10 to 25% of GGR, holding ~20% on a brand with ~€4M monthly GGR.
- Control cost weekly through wagering, offer value and target segment, with next-day checks during festive campaigns.
- Built missions, wheels, scratch cards, leaderboards and a loyalty store to lift engagement and deposits.

Risk, guardrails and platform improvements

- Set bonus guardrails including a 5× deposit max cashout, a €5 max bet while wagering, and exclusions for live, crash and high-RTP games.
- Cut bonus abuse by segmenting bonus hunters, blocking early-life bonuses for 3+ accounts per device or IP, and capping wagering bets.
- Closed a VIP control gap by limiting manual awards to eligible segments, after an out-of-policy cashback created negative NGR.
- Worked with SoftSwiss to automate max cashout as a multiplier rule, and added a platform rule of max 5 no-deposit bonuses per 10 minutes.
- Defined the player fields, segments and campaign history to move in a CRM migration from Optimove to Fast Track.

CRM Consultant, Crypto Casino (Contract)

Jan 2026 to Mar 2026

Remote | Crypto-first casino brand

- Built automated lifecycle onboarding and early-retention flows in Smartico for crypto-depositing players.
- Set up behaviour-led segmentation and campaign flows from scratch.

Account Manager

Mar 2022 to Feb 2024

Pragmatic Solutions (Techmojo) | B2B iGaming platform (PAM)

- Owned the platform's CRM module, turning operator needs into builds for onboarding, bonusing, segmentation and reporting.
- Launched 6 brands on Agile delivery, integrating CRM, payments, affiliate, risk and compliance modules.
- Bridged operators, product and engineering, and was awarded best Account Manager for retention and issue resolution.

Earlier Experience in Product, Project and CRM Roles

2012 to 2022

VAG Group, BERMAD, Tech Mahindra

- Product marketing focused on customer engagement, with solution selling and client meetings across India.
- Delivered Salesforce CRM rollouts and new-brand launches across SaaS and enterprise tech.
